

keeper

TRACEABILITY

Keeper uniquely identifies individual entities, through a unique encrypted code, printed in security ink.

SECURITY

Keeper offers a unique multi-level security method, with at its heart an ink and reading method that is unique at the atomic level and irreproducible.

INTEGRABILITY

Keeper can be applied to almost any type of material, occupies a few mm² and is totally invisible.

MULTILEVEL ACCESS

Keeper enables an access hierarchy, to share the right information only to selected entities. It can also be integrated into classic QRcodes to allow the sharing of public information with unauthenticated users.
