

Key Code based on Nanomaterials to protect personal and product identity

keeper

Keeper aims to bring a new anti-counterfeiting technology to the market, with an unprecedented level of security, traceability and cost-effectiveness. Keeper features the first system ever to combine a unique product identification with the possibility to connect only the right user to the related digital information.

Keeper makes traceability ensured by the security of authenticity.

Advantages

- Traceability
- Security
- Integrability
- Multilevel Access

Applications

Keeper is applicable to several sectors where counterfeiting and lack of traceability make the value chain insecure and consumers at risk of fraud.

Documents and Stamps

Food and Beverage

Pharma Packaging

Art and Design

Electronic Components
